DATE MAILED: 12/01/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/527,993

Applicant(s)

GUNTURI ET AL.

Examiner

Fazli Erdem

Art Unit

2826

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 September 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 5 and 6 is/are allowed.
- 6) ☒ Claim(s) 1-4, 8 and 9 is/are rejected.
- 7) ☒ Claim(s) 7 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed 9/18/2006, with respect to claims 1-4 and 7-9 have been fully considered and are persuasive. The non-final rejection issued on 6/19/2006 has been withdrawn. After further search and consideration this non-final rejection is issued.

Allowable Subject Matter

1. Claims 5 and 6 allowed.
1. Claim 7 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4, 8 and 9 rejected under 35 U.S.C. 103(a) as being unpatentable over Kuniya et al. (4,196,442) in view of Gungor et al. (5,944,097) further in view of Chiba et al. (4,482,912).

Regarding Claims 1-4, 8 and 9, in Fig. 2, Kuniya et al. disclose a semiconductor device comprising an electrically conducting base plate 6, at least one electrically conducting top plate 9, at least one semiconductor chip 3 including a semiconductor

material, a first main electrode 4 that makes contact with the base plate forming a plane interface and a second main electrode 5 that makes contact with the top plate, a housing 6, 9, 13 containing the base plate, top plate and semiconductor chip, where soldering material 8, 10 provided adjacent at least one of said first or second main electrodes that together with the semiconductor material form a eutectic alloy or an alloy whose melting point is below of the semiconductor material. Kuniya et al. fail to disclose the required graphite fiber material and the composite material with coefficient of thermal expansion close to semiconductor material. However, Gungor et al. disclose composite substrate carrier for high power electronic devices where in Figs. 2 and 4, graphite fibers are disclosed as element 10. Furthermore, Chiba et al. disclose a stacked structure having matrix-fibered composite layers and metal layer where in Figs. 2, 3 and 4, the required composite material with thermal coefficient close to the semiconductor material.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required graphite fibers and the required composite structure in Kuniya et al. as taught by Gungor et al. and Chiba et al., respectively, in order to have a power semiconductor device with better thermal characteristics.

Regarding Claim 2, composite material of top and bottom side of both the Kuniya et al. and Chiba et al. are the same material.

Regarding Claim 3, in claim 9 of Kuniya et al. 30% volume is disclosed.

Regarding Claim 4, both the Kuniya et al. and Chiba et al. disclose the matrix alloy.

Art Unit: 2826

Regarding Claims 8 and 9, the thickness of layers 4 and 5 are bigger than the thickness of layer 3.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fazli Erdem whose telephone number is (571) 272-1914. The examiner can normally be reached on M - F 8:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on (571) 272-1705. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
